Speech Writing

Greetings citizens of Bolton,

I am speaking with you today to address the abhorrent filth that plagues ~~the~~ our lives "Superheroes".

Firstly (a problem I'm sure you've experienced during these past 5 months), mass destruction. You may think the antagonists cause this but no! They simply provoke these do-gooders enough to send them into a bubble-hot rage. Their recklessness causes millions of pounds of damage that the council has to repeatedly fund by raising tax and all our money goes from our pockets.

During the last month, a 7.4 million of damage has been inflicted. On average that's £240000 per day. And you say these people protect you?

3 days earlier I'd witnessed a very wise consciousness from a flying brick which came flying after Superman slammed his head into a brick wall in anger. Horrified, shocked and worried I contacted the boy's parents from his phone and when they caught ear of this, they were far from happy. Numerous famous city destinations, gone. And all this because we still value these heroes as members of society. But if you join my political group called For a better future, we can make these heroes disappear and handle the ~~the~~ villains ourselves.

Speaking of my group, it is ~~still~~ a trending topic on most popular social media sites. We've become so popular, Spiderman himself attempted to shut us down. But the amount of people joining overwhelmed him. Our political status was too much for the gnomous web-slinger. Did you know? (Sense establishment) 4.5 million people have joined (online). And you are the reason this all works. That's right, for all those who think this is for selfish reasons but no! The more you join the more we can push these superheroes away, yet people may still think that they may gain nothing from this organisation. Well I think my ~~next~~ words will sway you a little.

When I was a mere boy, I had a grand. When that particular grand was 8 years old they started to show signs of superhuman powers. The ability to teleport objects at will. Yes, they found enjoyment helping the public. But this came with a massive downfall. Everytime he teleported something, the temperature of the object rises. And it kept rising. And that fateful day. 3 were killed and 4 were seriously injured. That fireworks factory. Let's just say that declarant isn't the best thing to catch on fire. But he was only powered with his power but if you join this group, your social status increases. With enough people we will banish these heroes. The full details are for members only so if you're interested then you can sign up online for free.

Overall I may sound petty, villainous, crazy and
stupid but, if you know deep down that heroes do
more harm than good, why stand ~~against~~ ^{with} them?

I thank you for your time.
